

I would like to offer my support to allow XM Satellite Radio to provide more local content for its listeners. The National Association of Broadcasters (NAB), the organization that represents the large radio and television owners, is using its lobbyists, campaign contributions and political influence to have Congress and the Federal Communications Commission limit XM's ability to provide you with "locally oriented" content, including the new XM Instant Traffic & Weather channels. I object to this and urge you to allow free competition to occur. Thanks.
